USING FOLIAR FUNGICIDES TO MANAGE SOYBEAN RUST

Editors

Anne E. Dorrance

Associate Professor and Extension Specialist
Department of Plant Pathology
Ohio Agricultural Research and Development Center
The Ohio State University

Martin A. Draper

National Program Leader, Plant Pathology
USDA-CSREES

Donald E. Hershman

Professor and Extension Specialist
Department of Plant Pathology
University of Kentucky

Acknowledgments

Support for this endeavor was supplied to AED and NCERA-208 through USDA-CSREES Smith-Lever Special Needs Funds.

A special thank you for support from the soybean producers through financial support from the soybean checkoff from the North Central Soybean Research Program, Plant Health Initiative, and Dr. David Wright.

A special thank you to Ohio State University Extension Director Keith Smith and Ohio Agricultural Research and Development Center Director Steven Slack for their support in this endeavor.

Trade Names

Trade names, suppliers, or other private labels are used for identification. No product endorsement is implied nor is discrimination intended toward similar products or materials not mentioned or listed. Ohio State University Extension and the participating universities and the Ontario Ministry of Agriculture, Food, and Rural Affairs make no warranty or guidance of any kind, expressed or implied, concerning the use of these products.

Trade and manufacturers' names are necessary to report factually on available data; however, the USDA neither guarantees nor warrants the standard of the product, and the use of the name by USDA implies no approval of the product to the exclusion of others that may also be suitable.
